NEW BUSINESSES IN KIT CARSON COUNTY 1993-1994:

Art Works
Herman Decorating
D & D Feeds
The Feed Bunk
Geoponic
Otter Wash
Hitchin' Post
Carousel Clothing
L & M Electronics
Mutual of Omaha
Knapp Realty
El Sol Restaurant
Hoof & Horn Restaurant
Claremont Inn
Classics on Wheels
Burger King
Steve's Gun Shop
Rough Rider Recovery Service
Investment Centers of America
Daylight Donuts
Yellow Rose Medical Clinic

These are new businesses that have started in 1993-94 and are still in operation. There are several other businesses that have expanded during this time period. Burlington has recently completed a large, modern fire station to accommodate the growing population. Also, there is a proposed hog operation for Kit Carson County that will provide approximately 100 new jobs and an annual payroll of \$2.8 million (see attached article).

Midwest Farms announces plans for area hog production facility

Ronald W. Houser, president of Midwest Farms, Inc. of Onalaska, WI, announced this week that they plan to construct a hog production facility 12 miles south of Burlington which will house 10,000 sows. The pigs will be raised from farrow to finish.

The company will employ approximately 100 people with salaries ranging from \$18,000 to \$42,000. "The average payroll will calculate to around \$28,000 per employee as it will total \$2,800,000 a year. And, of course, that is without benefits which we offer to all of our employees," Houser said.

The facility will cost \$40,000,000.

"We will also construct a feed mill within 18 to 24 months after the original project is completed," Houser stated. "We will then be purchasing 2,000,000 bushels of corn each year from the local farmers."

Houser also said, "There have been rumors that this is foreign money we are using to construct the hog production facility. This is not true. It is my project and my funds that will be used to build the production facility."

The proposed operation will be used as a multiplication farm with

See hog production facility, page 4

Hog production facility

from page 1

breeding stock provided by Pig Improvement Co., (PIC), a genetics firm who specializes in the production of lean pork.

It was announced last week that Midwest Farms, Inc. has a purchase option on 28 quarters of land south of Burlington. The company plans to lease out the farm land, and irrigation will be utilized with the affluent from the holding ponds of the swine operation. Greg Bowker, vice president of Midwest Farms said, "The affluent applied with a center pivot will consist of 99.5 percent water and .5 percent solids.

The company is now going through the process of determining whether a facility is feasible south of Burlington. They are testing the soil and water and applying for the proper permits from the State of Colorado.

Midwest Farms, Inc., has hog production facilities in Hennessey, Okla., Arapahoe, Neb., and a small one in Raymond, S.D.

Who is Midwest Farms, Inc.? It is a farm management company owned by Ronald W. Houser. He also owns Midwest

Security Insurance Co. in Onalaska, Wis., a firm which employees over 365 people in Wisconsin. Houser is recognized in his community as an outstanding business leader. He was recently honored by the LaCrosse Area Development Corporation as the dynamic leader of the year.

Houser says, "I'm a small town boy. I'm a farm boy. I was brought up to work. That's the

way my dad brought me up."

He grew up on a farm in Gills Coulee, northwest of West Salem.

His securities insurance business has grown from himself and a secretary to its present size.

Houser has been in the pig production business since 1987.

"We are looking forward to coming to the area," he concluded.

Same as last year's —

Council sets 1995 mill levy

The City of Burlington's mill levy has been set by the council for 1995 at 8.6 mills, which is the same as last year's.

Total revenue from property taxes for the city will be \$106,709, which represents an increase of \$4 over the previous year total of \$106,705.

"It has been the policy of the city to receive approximately the same amount of funds from property taxes for several years," stated Mayor Rol Hudler. "The passage of Amendment No. One does allow governing bodies to increase revenues based on the rate of inflation, growth, etc."

Burlington's valuation, as submitted by Kit Carson County Assessor Norman Travis, is going to be \$12,408,046. The valuation figure a year ago was \$12,407,629. Consequently, the valuation in Burlington has increased slightly by \$417.

"Amendment No. One really has little effect on Burlington as far as property tax revenues are concerned as we have such a low levy. The effects of the amendment on Burlington are on spending limitations. Even if you have a surplus established, and the council determines they want to spend a portion of that surplus, they cannot do so unless they cut expenses by the same amount in the general fund. In other words, it does little good for a municipality to have a surplus," said Mayor Hudler.

He went on to say, "Burlington has one of the lowest mill levies in the state, and has had for many, many years.

Perhaps the easiest way to explain how much in property taxes each individual is paying to the city is the following example:

"If you pay \$1,000 a year in property taxes on your home, the city would receive approximately \$90 of that total. Obviously, the school district and the county government get the lion's share of your property tax dollars."

"Out of a total budget," Hudler said, "that is estimated to be in excess of \$4,000,000 for 1995, the \$111,796 will certainly help, but it is a very small portion of our budget. In fact, the budget figures for the library alone for 1995 is around \$64,000.

The bulk of the city's revenues comes from the sale of electricity, water, sewer service charges and sales taxes.

"For some reason, there are many citizens who believe that the city receives all of their property tax dollars. Obviously, nothing could be more incorrect," the mayor related.

"The city has been extremely fortunate over the past several years in having adequate funding," the mayor stated. "We have constructed a new airport, recently completed another major improvement at the airport, built Old Town, remodeled a building for a new library and remodeled another building for a new city hall. And last year we spent

See city mill levy, page 6

City mill levy

from page 1

approximately \$126,000 to make major improvements on the swimming pool. All of these good things have been accomplished without putting an additional burden on the property taxes of all of us."

"And, as we announced three years ago, the city is debt free. This accomplishment has to make everyone feel good as it is the first time since 1918 the city has no debt.

"In all probability, we will not remain that way over a great length of time. Some improvements that are needed in the future will, no doubt, require bonds. That, of course, will be left up to the voters when the time comes. But for now, it is an excellent indication that the city is in very sound financial condition," Mayor Hudler concluded.

Mill levies, anticipated revenues reported for cities and towns

Valuations, mill levies and anticipated revenues from taxation for the six towns in Kit Carson County have been approved by the various councils and by the State of Colorado. The individual towns in the county first prepare their budgets and then establish mill levies to produce anticipated revenues.

In years past, state law limited the increases each municipality could establish. This was limited to a five percent increase in revenue. Two years ago, with the passage of the Tabor Amendment, increases in revenue are limited to the rate of inflation if there is an increase in valuation. If the valuation drops in a particular town, the levy cannot be increased to keep revenues the same as it is now illegal to raise levies without voter approval.

Five of the six towns in the county have an increase in valuation from a year ago. Only one town will have a decrease in revenue, while the remaining five will show increases in tax dollars.

From property taxes, the towns will have a total in revenue of \$286,843. This represents an increase of only \$928. Most of the towns have several other sources of revenue, usually received directly from the state, such as cigarette tax, road and bridge fund, etc. They also have revenues from their water and sewer departments, and, in Burlington's case, from electrical sales.

The levies for the taxes are established by the various governments within the county which include school districts, the county, towns and cities, and special districts. The value on figures for the agencies are established by the office of the Kit Carson County Assessor with complete guidelines and regulations established by the State of Colorado.

A breakdown of the property taxes for the towns in Kit Carson County follows:

Burlington

Valuation has increased by a modest \$417 to a total of \$12,408,046. The mill levy remains the same at 8.6 mills, while the anticipated revenue will be \$106,709, which is up from a year ago by \$3.

Bethune

Valuation has increased by \$53,005 to a new total of \$417,329. The mill levy is down by .35 of a mill to 3.81 mills. Projected income for Bethune is \$1,590, which is an increase of only \$74.

Stratton

Valuation figures in Stratton are up by \$27,177 from last year to a total of \$2,185,061. The mill levy, at 40.559, is down by .35 of a mill. Anticipated revenue is at \$88,624, an increase of \$335. Part of Stratton's levy is for bond redemption. The redemption levy has been set at 9.492 mills, and will generate a total of \$20,741. These figures are included in the totals above. Their operating money for the year will be \$67,883 when the redemption fund levy is subtracted.

Vona

Valuation in Vona has also increased to a new total of \$195,769. This represents an increase of \$15,721. The mill levy, at 14.750, is the same as last year and revenue is up by \$272 to a new total of \$2,888.

Seibert

The valuation figures in Seibert have decreased by \$1,282 to a

See mill levies, page 9

KCC mill levies

from page 1

total of \$976,872. The mill levy is the same at 15.829. It will generate a total of \$15,463 for the town, which is down by \$20 from last year.

Flagler

The valuation for Flagler has increased by \$7,559 to a new total of \$1,777,987. Total revenue for Flagler is \$71,569, which is an increase from last year of \$304.

The valuation of the six towns in the county is \$17,961,064,

which represents an increase of \$102,597. Total tax dollars collected are going to be \$286,843, which is an increase of \$928.

It should be obvious that municipalities in the county take very little of the property tax dollar. The largest share goes to all of the school districts within Kit Carson County, with the county standing next in line.

The next story will focus on all of the financial information on the county's school districts, Kit Carson and Yuma counties and Kit Carson and Lincoln counties.

Colorado job growth to continue in 1995, CU-Boulder forecast says

Colorado's economy is on a roll and continued job growth is expected in 1995, according to the University of Colorado at Boulder's annual business forecast.

"We're looking for 1995 to be a pretty strong year," said economist Richard Wobbekind of the College of Business and Administration.

The forecast calls for 51,900 new jobs to be created in the state next year, a strong 3 percent increase and only slightly slower than 1994.

Wage and salary employment is expected to increase to 1,774,600 in 1995, the highest level in the state's history. Healthy job growth is expected across the state.

"The big difference in our forecast is that we have the service sector growing more rapidly than other forecasts," Wobbekind said. The forecast represents the consensus of more than 70 Colorado business leaders on what the economy will do in the coming year.

Unemployment is expected to be 4.7 percent or 96,000 people in 1995, marking the sixth straight year that Colorado's unemployment rate will be lower than the national average. The cost of living is projected to increase 4.2 percent, exceeding the national inflation rate.

Net migration to the state in 1995 will continue but is projected to slow due to an improving economy in other parts of the nation. Population is expected to increase 1.9 percent to 3.7 million.

The 1995 forecast will be affected by national factors, especially federal monetary policy. If interest rates continue to rise, some sectors of the economy will be hampered, particularly construction, Wobbekind said.

Other projections of the 30th annual Business-Economic Outlook Forum include:

- Agriculture — Total realized gross farm income will increase to \$4.2 billion in 1995; net farm income is expected to rise to \$778 million as expenses are reduced. Livestock cash receipts have fallen during 1994 and will fall again in 1995. The projected 1995 value of \$2.5 billion is the lowest rate since 1987.

- Mining — This sector had the only job loss in 1994 and will also have a job loss in 1995. However, measuring the health of mining by employment is somewhat deceiving because productivity gains have been strong. The future strength of mining appears to be in quality coal production. Additional demand for coal will depend on amendments to the Clear Air Act and foreign coal demand.

- Construction — Employment will rise slightly in 1995, while the value of projects will fall. This anomaly is due to major construction firms taking out-of-state projects. Non-residential and non-building construction will rise slightly in 1995 with a drop in total construction due to less residential building.

- Manufacturing — Manufacturing had a substantial job increase in 1994 and we anticipate 2,000 new jobs in 1995. Non-durable and durable goods jobs will both increase with the bulk of the jobs occurring in the durable goods area.

- Transportation, communications and public utilities — This sector will experience job growth in all three areas. The staffing of Denver International Airport will add employment to the air transportation sector. Electric power is expected to increase 5.1 percent in 1995, and natural gas will rise 1.9 percent.

See job growth, page 7

job growth

from page 1

•Finance, insurance and real estate — Employment gains are expected in all three areas. Short-term interest rates will remain high as long as the national economy remains strong and inflation concerns are persistent. Long-term rates should fall slightly as the federal reserve's position is taken more seriously.

•Wholesale and retail trade — retail and wholesale trade continues to be one of the most important sectors in the state economy. Wholesale and retail trade sales are both projected to increase 7.5 percent in 1995. Sales growth will slow due to higher interest rates, less pent-up demand for consumer goods, a modest level of consumer confidence and a weaker real estate market.

•Services — The largest employment sector in the state economy showed the largest employment increase in the 1980s and continues to do so in the 1990s. In 1995, this sector will account for more than 50 percent of new job growth. This rate of growth is stronger than in 1994 as delayed hiring begins to occur. The most significant employment growth will be in business services.

•Tourism — The tourism sector performed well in 1994 and should have continued success in 1995. Higher levels of international visitors, ski-lift ticket sales and visits to parks and historic sites will support this growth.

•Government — Federal government downsizing continues to slow growth in this area. Overall, government job growth should be 1 percent in 1994 and 0.4 percent in 1995.

•International trade — A 5 percent increase to \$4.4 billion is forecast for manufacturing and agricultural exports in 1995. This area has seen particularly strong growth in non-electrical machinery and in measuring, scientific and controlling instruments, which account for more than 60 percent of all manufactured exports. Agriculture exports also will rise after a relatively weak 1994, led by meat, wheat, fruits and vegetables.

old national Punt, Pass and Kick champion. Kechter was featured on national TV during the San Diego-Miami football game for his efforts. The road to the championship began in Stratton at the local

region, to last weekend where he bested three other contestants that had flown in from across the nation. Toby is a sixth grader at Liberty and is the son of Bob and Brenda Kechter.

Certification of levies and revenues are approved

The certification of levies and revenues by the commissioners of Kit Carson County have been approved by the Department of Property Taxation. The certification includes valuations, mill levies, and anticipated revenues for all tax levying bodies in the county.

In a series of articles, The Record will present the facts and figures on all of the various taxing bodies in the county. The first article deals with county figures only.

The assessed valuation of Kit Carson County, which has dropped four of the last five years, has shown an increase. The new valuation figures for the county have been established at \$69,537,958, which is an increase of \$1,289,035 from a year ago.

The mill levy will remain the same at 40.942, the same it has been since the passage of the Tabor Amendment.

The revenue projected from property taxes for Kit Carson County will increase by \$52,777 to a new total of \$2,847,024. Last year's revenue was \$2,821,100.

The assessed valuation remains constant for all county funds. There is no bond redemption fund for county purposes. The mill levies remain the same in five funds, are up in one and down in another. Six of

the categories will show increases in revenue while one will show a decline.

The mill levies and revenues for all county funds follow:

General fund: The mill levy at 20.7 remains the same. The revenue for the general fund is \$1,439,436, which is an increase of \$26,683.

Road and bridge fund: The levy has been set the same at 13.151 mills. The revenues for the road and bridge fund have increased by \$16,952 to a new total of \$914,494.

Public welfare: The levy is the same at 1.5 mills. Revenues for this department are going to be up by \$1,934 to a new total of \$104,307.

Contingent fund: The levy is up by .39 of a mill to .531 of a mill. The revenue for the contingent fund will be \$36,925, which represents an increase of \$27,302.

Capital expenditures. The levy for this fund remains the same at .5 of a mill. Revenue for it is up slightly, \$645 to a new total of \$34,769.

Solid waste disposal: The fund has a mill levy of 2 mills, which has been the same for several years. Revenue is being anticipated at \$139,076, which is an increase of \$2,578.

See certification of levies, page 7

Certification of levies

from page 1

Public hospital. The mill levy for the hospital is down by .39 of a mill to 2.56 mills. Revenue for the hospital is also down by \$23,317. The new total is projected at \$178,017.

In the following weeks, The Record will present articles to keep the taxpayers informed of where their property tax dollars are being spent by the governing bodies within Kit Carson County.

You will find, for example, that the valuation in many areas has been increased, and some substantially.

You will also find that Bethune has the lowest levy in the county, followed by Burlington. Both are considerably lower than all of the other towns in the county.
